ICE Nigeria

Release
April 2014

ICE Nigeria by Prof. Dr. Ulrike Gut is licensed under a Creative Commons Attribution-Non-Commercial-Share Alike 3.0 Germany License. Permissions beyond the scope of this license may be available upon request.

1. Project team

The compilation of ICE Nigeria was directed by Prof. Ulrike Gut (gut[AT]wwu.de) at the Universities of Augsburg (2007-2011) and Münster (2011-2014). Project members were Anja Choon, Lilian Coronel, Eva Fischer, Robert Fuchs, Silvia Fruck, Anja Ginsheimer, Dr. Presley Ifukor, Gertrud Jäger, Melina Ruoss, Sebastian Sanudo, Paula Skosples, Dr. Taiwo Soneye, Silke Stagg, Dr. Ugo Ugorji, Holger Voormann, Eva-Maria Wunder and Christina Zumkeller. We gratefully acknowledge the generous assistance of our partners at the Obafemi Awolowo University Ile-Ife (especially Prof. Adewale Adegbite and Dr. Rotimi Taiwo), the University of Jos (Prof. David Jowitt), the University of Uyo (Prof. Inyang Udofot and Prof. Eno-Abasi Urua) and Covenant University at Ota (Dr. Taiwo Abioye).

2. Corpus format

The written part of the ICE Nigeria is available either as .txt files, as xml files or in a POS tagged version (see section 3). The spoken part is available as .eaf files and as .txt files. In addition, we are making all of the raw files available. We did not follow the ICE convention of arranging the corpus data in texts of 2,000 words each, but constructed separate files for each text produced by one author. The required number of words per text category adheres to the ICE guidelines (see section 4).

The following metadata is included (if available) in each xml file: transcriber's initials, place and time of text production, author's gender, age and ethnic group. A '?' is used for metadata that was not available. The spreadsheet "participants_ICE_Nigeria.xlsx" lists all speakers and writers represented in ICE Nigeria with their gender, age, ethnic group and occupation.

3. Annotation of the corpus

ICE Nigeria was annotated using Pacx, the **P**latform for **A**nnotation of **C**orpora in **X**ML (http://pacx.sourceforge.net/), developed by Holger Voormann. The spoken data was transcribed and time-aligned. The annotation process is described in Wunder et al. (2010) and Gut (2011). We did not use the SGML tags described in the ICE manual (http://ice-corpora.net/ice/manuals.htm), but used xml tags instead. The following metadata and text features were annotated with the following tags (see also "AnnotationSchema.xml"):

Metadata

metadata	<meta>
Transcriber	<transcriber>
Date when text was produced	<date>
Place where text was produced/published	<place>
Author's gender	<author><gender>
Author's age	<age>
Author's ethnic group	<ethnic-group>

Text features written part

Heading	<heading>
Paragraph	<p>
Unclear word/s	<unclear words>
	e.g. <unclear words="1"/>
Line break	<break />
Unusual punctuation	<punctuation>
Word in boldface	<boldface>
Word in italics	<italics>
Underlined word	<underline>
Superscript	<superscript>
Subscript	<subscript>
Small capitals	<small-capitals>
Change of typeface	<typeface-change>
Quotation	<quote>
Indigenous word	<indigenous>
Colloquialism	<coll>
	e.g.: 4 you <coll for="for you">
Deleted word/s	<deleted>
Discontinuous word	<discontinuous>
Signature	<signature>
Footnote	<footnote>
Untranscribable elements (graphs, formulas…)	<object>
	e.g. <object type="graphic"/>
Spelling error	<error>
	e.g. <error corrected="hypocrisy">
Mentions	<mention>
Editorial comment	<editor-comment>
Other language	<other-language>
Anonymised names	<x-anonym-x>
	e.g. <x-anonym-x type="family-name"/>
Extra-corpus material	<unannotated>

Tags spoken part

Other language	<other-language>
Indigenous word/s	<indigenous>
anonymised word/s	<anonymous>
unclear word/s	<unclear>
interrupted utterance	<interrupted>
hesitation	<hesitation>
repaired utterance	<repair>
quoted word/s	<mention>
transcriber's comment	<transcriber's comment>

The written part of the corpus was tagged for parts-of-speech by Prof. Stella Neumann at the University of Aachen using the TreeTagger (Schmidt 1994) and the Penn Treebank tagset (http://www.cis.uni-muenchen.de/~schmid/tools/TreeTagger/data/Penn-Treebank-Tagset.pdf, Santorini 1991).

4. Word count of text categories

Text type (ICE text category label)	ICE Nigeria file name	Words
Academic writing humanities (W2A)	AHum_01 - 11	20,014
Academic writing natural sciences (W2A)	ANsc_01 -11	20,017
Academic writing social sciences (W2A)	ASsc_01 -11	20,008
Academic writing technical (W2A)	ATec_01 - 11	20,006
